

Guidelines for creating InfoGrow Log events

Creating an event

1. Select department

2. Select *Event definition*

The screenshot shows the InfoGrow web interface. At the top, there is a navigation bar with 'Administration', 'Manage', 'Logs', 'Production', and 'For development' menus. A red arrow points to the 'Administration' menu. Below the navigation bar, there is a sidebar with 'HortiAdvice, Taastrup' and 'Last received measurement 03/07/2023 10:49:16'. A table of 'Greenhouse Compartments' is visible, with columns for 'Greenhouse Compartments', 'Degree Sun (°C)', and 'Avg. Humidity (%)'. The table has two rows: 'Jaaa' and 'Jehu'. A dropdown menu is open, showing options like 'Companies', 'Nurseries', 'Setup', 'Resources', 'Aranet', 'Crop definition', 'Event definition', and 'Setup tables'. A red arrow points to the 'Event definition' option. In the background, there is a table with columns for 'Photosynthesis sum (g CO2/m²)', 'Ligth use efficiency (g/kWh)', 'Avg. Pn Activity (g/h/m² leaf)', 'Heating (Wh/m² per day)', 'Growth light (Wh/m² per day)', and 'Avg. Humidity (%)'. The table has two rows: 'Jaaa' and 'Jehu'. An 'End date' field is set to '02. Jul 2023'.

Greenhouse Compartments	Degree Sun (°C)	Avg. Humidity (%)
Jaaa	205/32	42
Jehu	202/32	45

Photosynthesis sum (g CO2/m²)	Ligth use efficiency (g/kWh)	Avg. Pn Activity (g/h/m² leaf)	Heating (Wh/m² per day)	Growth light (Wh/m² per day)	Avg. Humidity (%)
-7/32	-	0	0	0	42
-5/32	-	0	0	0	45

Creating an event

3. Select *Create a main event type*

4. Name the event

The image shows a two-step process for creating an event in the HortiAdvice system. The top screenshot shows the 'Event definition' page with a green button labeled 'Create a main event type'. A red arrow points from this button to a modal dialog in the bottom screenshot. The modal dialog has a title 'Create a main event type' and a text input field for 'Designation' containing the text 'Pests'. Below the input field are two checkboxes: 'Check this if this is a main event for moving Batch' and 'This main event is only use for compartment'. At the bottom right of the modal are 'Save' and 'Cancel' buttons. The background of the bottom screenshot is dimmed, showing the same 'Event definition' page as the top screenshot.

Creating an event

5. Expand event

6. Select *Create new secondary event*

Creating a secondary event

For editing of event type, double-click on the line shown in the list

The screenshot displays the 'Secondary event type' form in the HortiAdvice application. The form is titled 'Secondary event type' and has a main event type of 'Pests'. It contains several input fields and buttons:

- Designation:** A text input field containing 'Aphids'.
- Use of chemical substance:** A checkbox that is currently unchecked.
- Designation for values:** An empty text input field.
- Standard value (use ; between values):** An empty text input field.
- Unit:** A dropdown menu currently set to 'pcs'.
- Note designation:** An empty text input field.
- Standard note (use ; between values):** An empty text input field.
- List designation for values and units:** A text area containing 'Number [10; 50; 100; 200] pcs'.
- List designation for notes:** A text area containing 'Damage [None; Low; Medium; High]'.

Two red arrows originate from the text 'For editing of event type, double-click on the line shown in the list' and point to the 'Add to list' buttons located below the 'List designation for values and units' and 'List designation for notes' text areas. The background shows a sidebar with navigation options like 'Growth regulation', 'Moving', and 'Pests', and a main event type list with 'Aphids' and 'Thrips'.

Creating a secondary event

If the event includes spraying, tick off the box
Use of chemical substance.

The screenshot shows the 'Create a secondary event type' form in the HortiAdvice system. The main event type is 'Pests'. The form includes the following fields and options:

- Designation:** A text input field.
- Use of chemical substance:** A checked checkbox.
- End production:** An unchecked checkbox.
- Designation for values:** A text input field.
- Standard value(use ; between values):** A text input field.
- Unit:** A dropdown menu.
- Note designation:** A text input field.
- Standard note(use ; between values):** A text input field.
- List designation for values and units:** A large text area.
- List designation for notes:** A large text area.

Buttons include 'Add to list', 'Remove selected item from list', 'Save', and 'Cancel'. A red arrow points to the 'Use of chemical substance' checkbox.

If adding a spraying event, *Sprayer Units* and *Sprayers* (under the *Manage* menu) should be created as well.

Creating a secondary event

If the event is linked to a terminating factor such as waste numbers or quality parameters at sale, tick off the box

End production
